

UNIT 3 · TOPIC 3.10

Understanding Fare Combinability

Mix and match fares — within the rules.

B.B.A. Aviation Management · Semester III · Unit 3: Fare Construction (Advanced)
Air Ticketing & Fare Construction (2ACBAM32) · Arun Kumar

TOPIC 3.10

Expedition Preview: Topic Intro

The graphic features a dark teal background with a faint world map. At the top left, a small white box contains the text 'UNIT 3 · TOPIC 3.10'. Below this, the text 'FARE CONSTRUCTION (ADVANCED)' is written in a smaller font. The main title 'Understanding Fare Combinability' is prominently displayed in a large, white, serif font. Underneath the title, the subtitle 'Mix and match fares — within the rules.' is written in a smaller, italicized font. To the right of the title is a large white play button icon. Further right is a circular compass rose with a dashed white border. The compass rose has 'N' at the top, 'S' at the bottom, 'W' on the left, and 'E' on the right. The text 'TOPIC 3.10' is centered within the compass rose. At the bottom left, a small white box contains the text 'AIR TICKETING & FARE CONSTRUCTION · UNIT 3 · TOPIC 3.10'. A red line with an arrow points from this box towards the right.

TOPIC 3.10

Navigator's Question

THINK ABOUT IT

Can you fly economy out and business back — on one ticket?

**THINK**

30 seconds alone

**PAIR**

1 minute with a neighbour

**SHARE**

2–3 answers with the class

TOPIC 3.10

Route Map for Today

1

3.10.1

What is fare combinability: combining fares on a multi-leg journey

2

3.10.2

Rules for combining fares from different sources or airlines

3

3.10.3

Common fare combinations

4

3.10.4

Example of combining different fare types and airlines

COURSE OBJECTIVES

- Define combinability and end-on-end
- Apply Cat 10 combination rules
- Identify common combinations
- Build a combined multi-leg fare

Pedagogy: Group Teaching and Learning

TOPIC 3.10.1

What Is Fare Combinability?

**Multiple fares**

Different fares priced together on one ticket.

**Cat 10 rules**

Combination rules say which fares may be combined.

**Cheaper totals**

Combining can give a lower price than one through fare.

**DEFINITION**

Fare combinability is the ability to combine two or more fares (half round-trip or one-way, same or different carriers) on a single ticket according to the fare rules.

TOPIC 3.10.1

Group Method to Combine Fares

TOPIC 3.10.2

Types of Combinations

Round Trip

Two ½RT fares — outbound and inbound.

Open-Jaw

Two ½RT fares with a surface gap.

Circle Trip

Several ½RT fares around a circuit.

End-on-End

Separate fares joined one after another.

TOPIC 3.10.2

Common Combination Rules

Rule	What it means
Same fare type	Some fares combine only with same type (e.g., excursion)
Any fare	Some allow combination with any fare of the carrier
Carrier	Combination with other airlines may be permitted or banned
Most restrictive	When combined, the strictest rules usually apply to the whole ticket
Price basis	Ticket is priced as sum of ½RT fares

TOPIC 3.10.3

Common Combinations

Different Classes

Outbound in Economy, inbound in Business: $\frac{1}{2}$ RT Y + $\frac{1}{2}$ RT J.

Different Seasons

Outbound high season, return low season.

Different Airlines

Outbound on AI, return on LH (if both rules allow).

TOPIC 3.10.3

Saving by Combining (Illustrative)

NUC 2,480

business class round trip

NUC 2,070 $\frac{1}{2}$ economy + $\frac{1}{2}$ business combined**17%**

saving with one business sector

TOPIC 3.10.4

Example: Mixed Class & Airline

DEL–FRA on Air India, FRA–DEL on Lufthansa (both permit combination).

- Outbound: ½RT economy fare on AI.
- Inbound: ½RT business fare on LH.
- Both fare rules must allow combination.
- Strictest rule applies to changes and refunds.

COMBINED FARE (illustrative)

DEL	AI	FRA	Q	1/2RT	NUC	420
FRA	LH	DEL	J	1/2RT	NUC	1,650

TOTAL					NUC	2,070

RULES: AI Q-fare penalties apply
to the whole ticket

TOPIC 3.10.4

Combined vs Single Fare

Combined

- Flexible class/airline mix
- Often cheaper
- More complex rules
- Strictest rule wins

vs

Single Through Fare

- One rule set
- Simpler to explain
- May be dearer
- Less flexibility in mixing

TOPIC 3.10

Navigation Exercise: Combination Builders

PEDAGOGY

Group Teaching and Learning

TIME · 12 min

FORMAT · Groups of 4

- 1 Each group gets a fare sheet with Cat 10 notes for 3 airlines.
- 2 Build the cheapest valid DEL–LON–DEL combination.
- 3 List which rules become the “strictest” rules.
- 4 Present and defend why your combination is valid.

Position Check Quiz

Q1**Fare combination rules are in ATPCO Cat...**

- A) 5
- B) 10
- C) 16
- D) 33

ANSWER

B**Q2****Joining two separate fares one after another is...**

- A) Open-jaw
- B) End-on-end combination
- C) Backhaul
- D) HIP

ANSWER

B**Q3****When fares are combined, usually...**

- A) The most flexible rule applies
- B) The most restrictive rule applies
- C) No rules apply
- D) Only taxes apply

ANSWER

B**Q4****NUC 420 + NUC 1,650 =**

- A) NUC 1,230
- B) NUC 2,070
- C) NUC 2,120
- D) NUC 1,650

ANSWER

B

DESTINATION REACHED

Key Takeaways

- ✓ Combinability lets different fares be priced on one ticket
- ✓ Cat 10 governs which fares can combine
- ✓ Common mixes: classes, seasons and airlines
- ✓ The strictest rule usually governs the whole ticket
