**SHARE**

2–3 answers with the class

4.9

Departure Schedule

1

4.9.1

What is multi-airline ticketing: one ticket, multiple airlines

2

4.9.2

Benefits and challenges (interline agreements, luggage handling)

3

4.9.3

Pricing and fare construction

4

4.9.4

How multi-airline pricing is calculated and how fare rules interact

YOU WILL BE ABLE TO

- Define multi-airline (interline) ticketing
- Weigh benefits and challenges
- Construct a multi-carrier fare
- Apply combined fare rules

Pedagogy: Learning Through Problem-Solving

4.9.1

What Is Multi-airline Ticketing?

Single ticket

Flights on two or more airlines on one ticket number.

Needs agreements

Interline (MITA/BIA) and IET between carriers.

One validating carrier

Chosen per IATA/GDS validating-carrier rules.

EXAMPLE

COK – AI – DEL – LH – FRA – UA – ORD on one ticket: three airlines, bags checked through to Chicago, protected if a delay causes a missed connection.

4.9.2

Benefits vs Challenges

Benefits

- Protection on missed connections
- Bags checked through
- Often cheaper through fare
- One booking to manage

vs

Challenges

- Agreements must exist
- Different rules and baggage
- Complex changes/refunds
- Minimum connection times

4.9.2

Luggage Handling Across Airlines

Through Tagging

Bag tagged to final destination.

Allowance

MSC / Res 302 decides allowance.

MCT

Minimum connecting time must be met.

Mishandling

Last carrier handles delayed-bag claims.

4.9.3

Pricing Options

Through Fare

One fare for whole journey

Combined Fares

End-on-end fares

Checks

Mileage, HIP, CTM

Convert

$\text{NUC} \times \text{ROE}$

Taxes

All countries

4.9.3

Agent Checklist

Agreements

IET between all carriers?

Connections

MCT met at each point?

Bags

Allowance clear to passenger?

4.9.4

Multi-Carrier Fare Calculation

Illustrative linear fare calc.

- Each carrier listed in sequence.
- Through fare to the destination.
- Validating carrier issues ticket.
- Prorated to each airline later.

```
FARE CALC (illustrative)

COK AI X/DEL LH X/FRA UA ORD
M 910.00 NUC910.00 END
ROE85.000000

INR 77,350 + TAXES
VALIDATING CARRIER: LH

// all values invented
```

4.9.4

How Fare Rules Interact

Situation	Which rule applies
Through fare of one carrier	That fare's rules for whole journey
Combined fares, different carriers	Each component's rules; strictest often governs
Changes	Most restrictive change rule
Refunds	Refund rules of each component
Baggage	MSC per IATA Res 302

4.9.4

Problem: Missed Connection

1 ticket

airline must rebook free

2 tickets

passenger may lose onward flight

MCT

always meet minimum connection time

Problem-solving: DEL–FRA delayed 3 hours, FRA–ORD missed. What happens on one ticket vs two?

4.9

Ticket Desk Drill: Build the Journey

PEDAGOGY

**Learning Through
Problem-Solving**

TIME · 12 min

FORMAT · Groups of 3

1

Plan a 3-airline itinerary from India to the Americas.

2

Check connection times against a given MCT table.

3

Decide validating carrier and baggage rule.

4

Solve a missed-connection scenario for your itinerary.

Final Boarding Call Quiz

Q1**Multi-airline tickets require...**

- A) Interline/IET agreements
- B) Group fares
- C) Only LCCs
- D) Paper tickets

ANSWER**A****Q2****MCT means...**

- A) Maximum Cabin Time
- B) Minimum Connecting Time
- C) Multi-Carrier Ticket
- D) Mileage Check Total

ANSWER**B****Q3****NUC 910 × ROE 85 =**

- A) INR 72,350
- B) INR 77,350
- C) INR 91,000
- D) INR 85,910

ANSWER**B****Q4****On one ticket, a missed connection due to delay is usually...**

- A) Passenger's problem
- B) Rebooked by the airline
- C) Refunded 50%
- D) Voided

ANSWER**B**

ARRIVED

Key Takeaways

One ticket can cover several airlines via interline/IET

Benefits: protection, through bags, better fares

Pricing: through or combined fares with all checks

Rules interact — strictest change rule, MSC baggage
