TOPIC 5.9

Mission Question

THINK ABOUT IT

Should every air ticket show how much CO₂ your flight produces?

**THINK**

30 seconds alone

**PAIR**

1 minute with a neighbour

**SHARE**

2-3 answers with the class

TOPIC 5.9

Mission Briefing

1

5.9.1

Introduction to green ticketing concepts

2

5.9.2

How airlines incorporate sustainability into ticket sales

3

5.9.3

Carbon offset programmes and eco-friendly flight options

4

5.9.4

The role of customers in supporting sustainable aviation

MISSION OBJECTIVES

- Explain green ticketing
- Describe airline sustainability sales features
- Evaluate offsets and SAF
- Recommend customer actions

Pedagogy: Expeditionary Learning

TOPIC 5.9.1

Why Aviation Sustainability Matters

~2-3%

of global CO₂ emissions from aviation
(approx.)

2050

IATA net-zero carbon target (agreed
2021)

CORSIA

ICAO offsetting scheme for international
flights

Figures approximate; see IATA/ICAO for latest data.

TOPIC 5.9.1

What Is Green Ticketing?

**Emissions shown**

CO₂ per passenger displayed at booking.

**SAF options**

Pay to add sustainable aviation fuel to your flight.

**Offsets**

Fund projects that reduce or remove CO₂.

**DEFINITION**

Green ticketing means building environmental information and choices — emissions data, SAF contributions and offsets — into the booking process.

TOPIC 5.9.2

How Airlines Sell Sustainability

CO₂ Calculators

e.g., IATA CO2 Connect, airline calculators.

Green Fares

Fares that include SAF/offsets (e.g., Lufthansa Green Fares).

Metasearch Labels

Google Flights shows emissions estimates.

Loyalty Rewards

Bonus points for green choices.

TOPIC 5.9.2

Agent's Green Toolkit

**Inform**

Share emissions data when relevant.

**Corporate policies**

Many companies now track travel CO₂.

**Avoid greenwashing**

Don't overstate what offsets achieve.

**CAREER NOTE**

Sustainability reporting for corporate travel is a growing skill area for travel management companies.

TOPIC 5.9.3

Offsets vs SAF

Carbon Offsets

- Fund forestry or clean energy
- Cheap and easy
- Quality varies
- Doesn't cut flight emissions

VS

Sustainable Aviation Fuel

- Made from waste oils, biomass, etc.
- Cuts lifecycle CO₂ significantly
- Expensive, limited supply
- Real in-sector reduction

TOPIC 5.9.3

Eco-Friendly Flight Choices

Fly Non-Stop

Take-offs burn the most fuel.

Newer Aircraft

A320neo / 787 use less fuel per seat.

Economy Cabin

Lower emissions per passenger than premium.

Pack Light

Less weight, less fuel.

TOPIC 5.9.4

The Customer's Role

TOPIC 5.9.4

Expedition Field Notes

Compare three options for DEL-BOM (use Google Flights emissions).

Option	Emissions (kg CO ₂)	Price	Choice?
Non-stop, new aircraft	—	—	—
Non-stop, older aircraft	—	—	—
One-stop connection	—	—	—

Note: Students fill in the table during the activity.

TOPIC 5.9

Innovation Lab: Green Route Expedition

**PEDAGOGY****Expeditionary Learning****TIME · 15 min****FORMAT · Groups of 4 with devices****1**

Pick a domestic and an international route.

2

Use Google Flights to record emissions and prices for 3 options each.

3

Find one airline SAF or offset product and its cost.

4

Recommend the “greenest sensible” option and present evidence.

TOPIC 5.9*Click to reveal each answer*

System Check Quiz

Q1**SAF stands for...**

- A) Safe Airline Fare
- B) Sustainable Aviation Fuel
- C) Standard Air Freight
- D) Seat Allocation File

ANSWER**B****Q2****ICAO's international offsetting scheme is...**

- A) CORSIA
- B) NDC
- C) BSP
- D) MITA

ANSWER**A****Q3****Which usually has lower emissions per passenger?**

- A) First class
- B) Economy class
- C) Private jet
- D) Business class

ANSWER**B****Q4****IATA's net-zero target year is...**

- A) 2030
- B) 2040
- C) 2050
- D) 2070

ANSWER**C**

MISSION COMPLETE

Key Takeaways

- ✓ Green ticketing adds emissions data and choices to booking
- ✓ Airlines offer calculators, green fares, SAF and offsets
- ✓ SAF cuts emissions; offsets compensate
- ✓ Customers influence change through informed choices

EXIT TICKET Write 1 thing you learned today + 1 question you still have.
