TOPIC 1.12

Pre-Flight Question

**THINK ABOUT IT**

In 2035, will you still need a ticket, a boarding pass — or even a phone — to fly?

**THINK**

30 seconds alone

**PAIR**

1 minute with a neighbour

**SHARE**

2-3 answers with the class

TOPIC 1.12

Today's Flight Plan

1

1.12.1

Technological advancements: self-check-in kiosks, mobile apps, AI and automation

2

1.12.2

Integration with other services: payment gateways, baggage systems, airport coordination

3

1.12.3

Tracking and managing booking data: flight status, customer preferences and PNR

4

1.12.4

Future trends: blockchain in ticketing, AI for personalisation

**BY LANDING, YOU WILL**

- Describe self-service and AI tools in ticketing
- Explain how ticketing integrates with airport systems
- Show how booking data is tracked and used
- Evaluate blockchain and AI as future trends

Pedagogy: Technology-Based Learning

TOPIC 1.12.1

Self-Service Revolution

Passengers now do much of what agents once did.

Kiosks

Common-use self-service (CUSS) kiosks for check-in and bag tags.

Mobile Apps

Book, check in, get boarding passes and live alerts on the phone.

DigiYatra

India's facial-recognition entry and boarding, launched in 2022.

Self Bag Drop

Passengers tag and drop bags with no counter queue.

TOPIC 1.12.1

AI & Automation in Ticketing

Chatbots

AI assistants handle bookings, changes and FAQs 24/7 on web and WhatsApp.

Auto-reissue

Systems automatically rebook passengers when schedules change.

Smart pricing

Machine learning refines demand forecasts and offers.

CAREER TIP

Automation takes over routine tasks — the future ticketing professional handles complex cases, advises customers and manages the technology itself.

TOPIC 1.12.2

One Booking, Many Connected Systems

TOPIC 1.12.2

Baggage & Airport Coordination

Bag Tag Link

Each bag tag number is linked to the passenger's record.

RFID Tracking

IATA Resolution 753 requires tracking bags at key points of the journey.

Interline Transfers

Bags move between airlines on one ticket.

Live Updates

Gate changes and delays pushed to apps and agents instantly.

TOPIC 1.12.3

Tracking a Booking End to End

Data captured at every stage becomes insight.

TOPIC 1.12.3

Using Booking Data Wisely

What airlines learn from tracking bookings.

Who

customer segments and loyalty tiers

When

booking windows and peak travel dates

What

preferred seats, meals and add-ons

Data must be secured and used with consent — privacy laws apply to PNR and customer profiles.

TOPIC 1.12.4

Future Trends: Blockchain & AI

Blockchain

- Tamper-proof shared ledger
- Faster interline settlement between airlines
- Tokenised tickets and loyalty points
- Secure digital identity for travel

AI Personalisation

- Offers tailored to each traveller
- Predictive rebooking during disruptions
- Voice and chat booking assistants
- Generative AI trip planning

TOPIC 1.12.4

Case Study: A Disrupted Journey

Apply everything from Unit 1.

**Situation**

Fog cancels a DEL-BOM flight. The passenger has a BOM-DXB connection on a codeshare partner.

**Questions**

Who rebooks? What happens to the PNR, ticket coupons and bags? How is the customer told?

**Task**

Groups map the systems and people involved and propose the best solution.

**CONNECT THE DOTS**

Airline types (1.1) · journey type (1.2) · codeshare (1.3) · fare rules (1.4) · GDS (1.5) · PNR (1.6) · e-ticket (1.7) · agent (1.8) · schedule (1.9) · service (1.10) · booking (1.11) · technology (1.12).

TOPIC 1.12

Cabin Crew Activity: Future Travel Pitch

**PEDAGOGY****Technology-Based Learning****TIME · 12 min****FORMAT · Groups of 4****1**

Each group picks one technology: kiosk, app, AI chatbot, RFID bags or blockchain ticket.

2

Research one real airline or airport using it (phones allowed).

3

Solve the disrupted-journey case using your technology.

4

Pitch in 90 seconds: benefit to passenger, airline and agent.

Pre-Landing Check

Q1**DigiYatra in India uses...**

- A) Paper tickets
- B) Facial recognition
- C) Fax
- D) Barcodes only

ANSWER**B****Q2****DCS stands for...**

- A) Direct Customer Service
- B) Departure Control System
- C) Data Coding Standard
- D) Digital Card Security

ANSWER**B****Q3****Which IATA resolution covers baggage tracking?**

- A) 722
- B) 753
- C) 830
- D) 100

ANSWER**B****Q4****A key benefit of blockchain in ticketing is...**

- A) Bigger seats
- B) Tamper-proof shared records
- C) Lower fuel use
- D) More slots

ANSWER**B**

SAFE LANDING

Key Takeaways

- ✓ Kiosks, apps, DigiYatra and AI make travel self-service
- ✓ Ticketing integrates with payments, DCS, baggage and airport systems
- ✓ Tracking booking data drives service — within privacy rules
- ✓ AI is here now; blockchain is emerging
